

# Crown Pole and Signal Post Grab

Suitable for use with:  
JCB JS Super Railers

- This grab enables the safe installation of crown poles up into overhead gantries with unparalleled speed and agility. This new method of installing crown poles offers unprecedented efficiencies and time savings.
- Also suitable for the installation of signal posts onto concrete footing bases.
- Rubber grab linings ensure no damage to poles/posts
- Precision accurate hydraulic systems and tilt, rotate, angle, geometries ensure easy installation of the pole/post to its fixing points.
- Super Railer can be mounted on the rail during operation in almost all scenario's.
